

Dear friends and colleagues,

Vancouver is proud to host the Canadian Medical and Biological Engineering Society's (CMBES) 45th annual conference scheduled for May 16th – 18th, 2023. Don't pass up this unique opportunity to participate in CMBES' first in-person conference since the beginning of the COVID-19 pandemic!

Our conference will have something for everyone. While attending the event, you will meet and hear from some of the most progressive thinkers in the biological and medical engineering profession. Whether you are a healthcare administrator, manager, engineer, technologist, industry professional or nurse/clinician, there are several key benefits for you and your staff to attend. Some of these benefits include:

- Enhance your knowledge through Academic, Medical Device Innovation & Development, Clinical Engineering and Continuing Education Streams.
- Network and learn from colleagues from across Canada.
- Learn about technology trends in the Exhibitor Hall from biomedical equipment vendors, test equipment vendors, alternative service providers, educational institutions, and government agencies.
- Share knowledge and best practices with your colleagues.
- Keep abreast of the latest technological advances and practices in our professions.
- Expand skills through vendor service education training.

Vancouver is a modern, vibrant city that seems built into, and built up from, some of the most awe-inspiring natural landscapes on the planet. It is a gathering place for people of many backgrounds where the ocean, forest and mountains converge. Our 2023 CMBEC45 Conference Organizing team is dedicated to organizing a truly memorable event. Your participation is welcome, and we look forward to seeing you in Vancouver, BC in May!

Sincerely,

Brendan Gribbons,
CMBEC45 Chair
